### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Timothy Kroboth on June 18, 2004.

2. The application has been amended as follows:

Claims 1-5 have been canceled without prejudice.

Claim 11, line 6, after "structure," -- and-- as been added.

Claim 11, lines 9-12, "and wherein said receptacle boss corresponds to a generally frustoconically shaped cavity in a bottom wall of said receptacle, of an appropriate diameter for receiving at least a lower portion of said cup" has been deleted.

Claim 12, lines 2-3, "for forward/rearward positioning" has been deleted.

Claim 12, lines 4-5, "by a seated individual supported by said support structure" has been deleted.

Claim 12, line 6, "sufficient" and the second use of the word "said" have been deleted.

Claim 12, line 7, "and hence of said receptacle".

Claim 14, line 1, after "wherein" -- said receptacle boss corresponds to a generally frustoconically shaped cavity in a bottom wall of said receptacle, of an

appropriate diameter for receiving at least a lower portion of said cup, and -- has been added.

Claim 16, line 2, "in combination" has been changed to -- for use --.

Claim 16, line 4, "non-planar" has been deleted.

Claim 16, line 6, after "receptacle" --rotatably-- has been added.

Claim 16, lines 16-17 "said positioning to be convenient for collection of a stool specimen in said receptacle" has been changed to --positioning of said support bracket --.

Claim 17, lines 2-3 "and a gap between said seat and support structure assists the support bracket adjustability" has been deleted.

3. The following is an examiner's statement of reasons for allowance:

The Examiner provided reasons for allowance in the previous action. The Examiner wishes to note, however, that claim 11 has been broadened by Examiner's amendment but still falls within the limit of allowable subject matter based on the claiming of a receptacle, a support bracket with an aperture and adapted to be supported by a support structure. The receptacle comprises a generally frustoconically shaped boss that snugly fits in the aperture of the support bracket but still allows the receptacle to be rotated within the aperture and be removed from the aperture.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

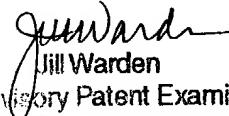

4. The Examiner wishes to correct a mistake in the previous action involving the Response to Arguments section. On page 5 of the previous action, the Examiner mistakenly referred to the features of claim as still being rejected. This was an error on the Examiner's part. Claim 3 was objected to – not rejected.
